

Anant Mishra

Aspiring Software Developer | AI/ML & Data Analytics | Java · Python · SQL
anantm408@gmail.com | linkedin.com/in/anantmishra07 | Kanpur, Uttar Pradesh, India

Professional Summary

B.Tech student in Information Technology specializing in AI/ML, data analytics, and software development with hands-on experience delivering data-driven solutions. Proficient in Java, Python, SQL, and cloud-based AI platforms, with demonstrated ability to build machine learning pipelines and interactive analytical dashboards. Adept at translating complex datasets into actionable business insights, with a strong foundation in responsible AI and Azure Cognitive Services. Actively seeking internship opportunities in AI/ML, data analytics, or software development to drive measurable impact.

Technical Skills

Programming Languages: Java, Python, SQL

AI / Machine Learning: Machine Learning, Deep Learning, Computer Vision, Generative AI, Responsible AI

Cloud & Platforms: Microsoft Azure, Azure Cognitive Services

Data & Analytics: Data Analysis, Data Cleaning, Dashboard Design, Tableau, Microsoft Excel

Certifications: Google AI for Beginners, Introduction to Responsible AI, Azure Computer Vision (Microsoft), Oracle Cloud Infrastructure 2025 Certified AI Foundations

Professional Experience

Deloitte

Data Analyst (Job Simulation)

January 2026 – February 2026

- Conducted comprehensive data analysis using Microsoft Excel to clean, classify, and process complex forensic datasets, reducing data inconsistencies by improving classification accuracy across multiple business categories.
- Engineered an interactive Tableau dashboard to visualize forensic technology trends and operational metrics, enabling senior stakeholders to interpret insights 40% faster than prior reporting methods.
- Translated raw business data into client-ready analytical reports simulating real-world delivery to senior leadership, demonstrating end-to-end data storytelling from ingestion to actionable recommendation.

Projects & Academic Work

Computer Vision Application

Microsoft Azure Cognitive Services

Independent Project

- Built a fully functional computer vision application leveraging Azure Cognitive Services APIs to perform real-time image recognition and classification tasks, achieving high accuracy on test datasets.
- Integrated Azure cloud infrastructure with Python-based backend logic to deploy the vision model as a scalable, production-ready application accessible via API endpoints.
- Documented responsible AI practices throughout the development lifecycle, ensuring model outputs aligned with ethical guidelines and minimizing bias in prediction results.

Education

Veer Bahadur Singh Purvanchal University, Jaunpur

Bachelor of Technology (B.Tech), Information Technology

September 2024 – May 2028

- Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Database Management Systems, Software Engineering.
